Let's Build The Future Together.

BACKGROUND

A beautiful landlocked nation, located between two economically growing nations, Nepal has a diversified climate (70m to 8848m from sea level) and landmass (Mountains, Hills & Terai) along with under-utilized land and water resources that offers a huge untapped potential for sustainable innovative agro ventures. Nepal has an agriculture based economy with over 80 % of the population being involved in it and thus is the biggest contributor (41%) to the nation's GDP. However, trade deficit on agriculture is more than NPR 70 billion and rising each year. Nepal still relies on imports for agriculture produce and has not been able to convert the current substantial farming to commercial farming. Therefore, there is a pressing need for the agriculture system to be converted into a commercial sector in order to use agriculture as a tool for the nation's prosperity.

HIGHLIGHTS OF NEPAL AGRITECH INTERNATIONAL EXPO 2017

- Nepal's first ever show on Agriculture, Farm Machinery, Dairy, Poultry, Livestock, Farm Equipment & Technology
- Organized at Bhrikuti Mandap from February 17th-19th, 2017
- Supported by the Ministry of Agriculture Development, Ministry of Livestock Development, Project for Agricultural Commercialization and Trade(PACT), Directorate of Agriculture Engineering, Nepal Agricultural Co-operative Central Federation Limited, Agro Enterprise Centre-FNCCI, financial institutions, universities, and research center
- Over 130 companies participated with 60 international companies from India, United States, Belgium, Netherlands, China, Malaysia, Taiwan, Bangladesh & Turkey
- The event also saw participation from embassies, bi-lateral agencies, donors, INGOs, NGOs Projects, Cooperatives, Banks, Private Sectors, etc.
- Generated a total of over 1 Lakh visitors and farmers from all over Nepal
